## **RFP FREQUENTLY ASKED QUESTIONS#1 (FAQ's) #2864-14**

### **REQUEST FOR PROPOSAL BROWNFIELDS ASSESSMENT PUBLIC OUTREACH, ENVIRONMENTAL SITE CHARACTERIZATION, AND CLEANUP PLANNING Solicitation #2864-14B**

#### **Question/Answer:**

Q1. Can you provide more detailed information on how Task 2 – Bullets 5 & 6 is connected to the Community Engagement portion of the proposal rather than Task 3?

A1. Bullets 5 & 6 are included under Task 2 in coordination with but also distinct from Task 3 because we envision that the inventory-related work could include both existing data from DEQ and windshield surveys as well as information from the community. We see some level of community engagement discussion happening through the public meetings, especially with property owners and affected stakeholders, to help inform the inventory and the prioritization of the sites. However, items under Task 3 may need to be done prior to the community engagement items under Task 2, and then Task 3 revisited depending on the public feedback and process developed for incorporating that feedback. Keep in mind that all tasks in the Scope of Work should be seen as part of the overall Program Development/Introductory Task where we creatively develop a process for site inventory and assessment and community engagement that will meet the program goals and objectives.
