Subject: Lot on 155th subdivision

As a Murrayhill home owner I have very surprised and upset that the subdivision of a standard Murrayhill lot is being considered. The impact of this high density lot can be significantly detrimental to the home owners, community and natural resources in the area.

This lot is adjacent to the power lines trail; causing unknown and very likely detrimental impact to the plant and animal life the City of Beaverton and Murrayhill community are known for.

There simply is no precedent for a subdivision of this nature in this neighborhood. I fear should this subdivision be allowed, the ripple effect throughout the community will be severe...the flood gates are open!

Please reconsider the approval and direction for this neighborhood.

Thank you.
