To: Commissioner

We are Dai Ngo & Hien Nguyen, the owner and were resident from 2005 to 2010 of property 11365 SW Clifford St. Beaverton Oregon 97008.

Since 2005 to 2010, we were living on Clifford St, we observed three things happened to our house frequently. First, we had so many balls flew over to our backyard. Second, whenever raining heavily there was a lot of water over flow from school to our backyard. And lastly, there were too much noise from those people playing from school field.

Even though we no longer live in house on clifford, I still get complaint about these from my tenants. I would like to suggest the new school soccer/base ball/football field should be 40ft away from our backyard fence to prevent any ball flying over our backyard and reduce noise (right now is ~5 feet). And please make sure the drainage system work properly to stop water from over flowing to my backyard when heavy rain.

Sincerely
